(indicate surnames, scientific degrees, scientific titles and positions of developers; everyone who teaches the specified academic discipline must be among the developers)

Developers:

Prof. Mykola ARYAYEV as. of prof. PhD Daria USENKO. as. of prof. PhD Larysa KAPLINA.

Note. In the case of publication of methodological developments as an independent printed work, the academic council of the faculty provides a recommendation for publication in the presence of two reviews, one of which is external — from a reviewer of another institution of higher education.

Seminar lesson No. 8

Topic: Prolonged cough in children. Elaboration of the algorithm for communication with the child's parents to determine the risk of asthma in children under 5 years of age.

Purpose: Deepening of knowledge and master the skills of mastering professional competences regarding communication with the parents of a child with a long cough, obtained in the course of studying the subject; promoting the development of creative thinking. The ability to logically express and argue one's thoughts, to listen to each other, to criticize productively.

Basic concepts: Algorithm for surveying parents regarding the probability of developing bronchial asthma in a child under 5 years of age.

Equipment: a mannequin of a child under 5 years of age.

Study time: 1 hour.

Plan

I. Organizational moment (greetings, checking the audience, the message of the topic, the purpose of the lesson, the motivation of students to study the topic).

II. Control of basic knowledge (frontal survey on the basic terminology).

Questions to check basic knowledge on the topic of the seminar:

1. Algorithm of communication with the child's mother in order to determine the probability of bronchial asthma.

III. Discussion of theoretical issues:

1. Algorithm of communication with the child's mother in order to determine the probability of bronchial asthma (report, discussion).
2. Communication with the mother of the child in order to determine the probability of bronchial asthma in a child under 5 years of age (role-playing game).

The discussion of theoretical issues can take place in the form of a role-playing game, answers to questions, debates, discussions, presentations with reports, abstracts, discussion of reports and abstracts, reviewing student answers, etc.

Topics of role-playing games/reports/abstracts

1. Communication with the mother of the child in order to determine the probability of bronchial asthma in a child under 5 years of age (role-playing game).

Students can prepare didactic visual guides in the form of tables, code diagrams, slides, drawings, portraits of famous specialists, preparations during preparing a report, role-playing game, abstract, analytical review, etc.

IV. Summary of results.
