Seminar session No. 7____

Topic: "Algorithm of establishing a pediatric diagnosis for inflammatory diseases of the urinary system in children in the practice of family medicine."

Purpose: To deepen knowledge and master skills in inflammatory diseases of the urinary system in children in the practice of family medicine.

Basic concepts: Algorithm for establishing a pediatric diagnosis in the practice of family medicine. Inflammatory diseases of the urinary system in children in the practice of family medicine.

Equipment: a child's mannequin

Study time: 2 hours

Plan

I. Organizational moment (greetings, checking those present, announcing the topic, the purpose of the lesson, motivating applicants to study the topic).

II. Control of basic knowledge (frontal survey on basic terminology)

Questions to check basic knowledge on the topic of the seminar:

1. Communication with the child's mother in case of inflammatory diseases of the urinary system in children in the practice of family medicine.
2. Development of a pediatric diagnosis algorithm for inflammatory diseases of the urinary system in children in the practice of family medicine.
3. Working out the definition, etiopathogenesis, classification of inflammatory diseases of the urinary system in children in the practice of family medicine.
4. Elaboration of the peculiarities of clinical manifestations in inflammatory diseases of the urinary system in children in the practice of family medicine.
5. Elaboration of the scope and features of laboratory diagnostics for inflammatory diseases of the urinary system in children in the practice of family medicine.
6. Elaboration of the features of differential diagnosis in inflammatory diseases of the urinary system in children in the practice of family medicine.
7. Elaboration of the principles of treatment for inflammatory diseases of the urinary system in children in the practice of family medicine
8. Elaboration of the principles of prevention, prognosis for inflammatory diseases of the urinary system in children in the practice of family medicine.

III. Discussion of theoretical issues:

1. Algorithm for establishing a pediatric diagnosis for inflammatory diseases of the urinary system in children in the practice of family medicine.
2. Definition, etiopathogenesis, classification of inflammatory diseases of the urinary system in children in the practice of family medicine.
3. Features of clinical manifestations, scope and features of laboratory and instrumental diagnostics for inflammatory diseases of the urinary system in children in the practice of family medicine.
4. Problems of differential diagnosis, principles of treatment for inflammatory diseases of the urinary system in children in the practice of family medicine.

5. Dispensary observation, prevention, prognosis for inflammatory diseases of the urinary system in children in the practice of family medicine.

Discussion of theoretical issues can take place in the form of role-playing, answers to questions, debates, discussions, presentations with reports, abstracts, discussion of reports and abstracts, review of applicant answers, etc.)

Themes of role play/reports/abstracts

1. Algorithm for establishing a pediatric diagnosis for inflammatory diseases of the urinary system in children in the practice of family medicine. (report, discussion).
2. Peculiarities of clinical manifestations in inflammatory diseases of the urinary system in children in the practice of family medicine.
3. Scope and features of laboratory and instrumental diagnostics for inflammatory diseases of the urinary system in children in the practice of family medicine.
4. Differential diagnosis, principles of treatment for inflammatory diseases of the urinary system in children in the practice of family medicine.
5. Dispensary observation, prevention, prognosis for inflammatory diseases of the urinary system in children in the practice of family medicine.

When preparing a report, role-play, essay, analytical review, etc., applicants can, along with this, prepare didactic visual aids in the form of tables, code diagrams, slides, drawings, portraits of famous specialists, drugs, etc.).

IV. Summing up

List of recommended literature
