Developers:

(indicate surnames, scientific degrees, scientific titles and positions of developers; everyone who teaches the specified academic discipline must be among the developers)

Developers:

Prof. Mykola ARYAYEV as. of prof. PhD Victor BIRYUKOV. as. Mykhailo STRELTSOV

*Note.*In the case of publication of methodological developments as an independent printed work, the academic council of the faculty provides a recommendation for publication in the presence of two reviews, one of which is external — from a reviewer of another institution of higher education

Seminar lesson No. 1

Topic: Cardiomegaly in children with congenital heart defects.

Purpose: To deepen knowledge and master the skills of diagnosis and differential diagnosis of congenital heart defects obtained in the course of studying the subject; promoting the development of creative thinking. The ability to logically express and argue one's thoughts, listen to each other and criticize productively.

Basic concepts: Congenital heart defects. Cardiomegaly.

Equipment: PAT auscultation simulator.

Study time: 2 hours.

Plan

I. Organizational measures (greetings, checking those present, announcing the topic, purpose of the lesson, motivating applicants to study the topic).

II. Control of basic knowledge (frontal survey on basic terminology)

Questions to check basic knowledge on the topic of the seminar:

1. Etiopathogenesis of the development of congenital heart defects .
2. Classification of congenital heart defects .
3. Features of hemodynamic disorders of a newborn child with congenital heart defects .
4. Clinical picture of congenital heart defects .

III. Discussion of theoretical issues:

1. Leading pathogenetic mechanisms of disorders in congenital heart defects.
2. Differential diagnosis of congenital heart defects in children.

Discussion of theoretical issues can take place in the form of role-playing, answers to questions, debates, discussions, presentations with reports, abstracts, discussion of reports and abstracts, review of applicant answers, etc.)

Themes of role-play/reports/abstracts

1. Algorithm of differential diagnosis of congenital heart defects (report, discussion, discussion of reports and review of applicant answers).
2. Diagnosis and management of congenital heart defects with enrichment of the small circle of blood circulation (role play).
3. Diagnosis and management of congenital heart defects with impoverishment of the small circle of blood circulation (role play).

When preparing a report, role-play, abstract, analytical review, etc., applicants can, along with this, prepare didactic visual aids in the form of tables, code diagrams , slides, drawings, portraits of famous specialists, drugs, etc.).
