

MINISTRY OF HEALTH OF UKRAINE

Odesa National Medical University
International Faculty
Department of Philosophy, Bioethics and Foreign languages

Syllabus of the course
“The English Language”

| | |
|-------------------------------|--|
| Scope | 90 hours / 3 ECTS credits |
| Term, educational year | 1 st year/II term |
| Days, time, place | According to the schedule |
| Instructors | Professor Lyudmila G. Rusalkina; Associate professors: Veronika Ye. Abramovych, Olena V. Kiriazova; Senior instructors: Nataliia V. Lasor, Elina M. Mokrienko, Anna I. Levytska Instructors: Anastsiiia A. Tsiba, Oleksandr M. Bermas. |
| Contact phone | +048 753-07-17 |
| E- mail | odmedinyaz@onmedu.edu.ua |
| Location | Department of Philosophy, Bioethics and Foreign Languages; 2 Pasteur str., Odesa |
| Consultations | Every Thursday from 2 p.m. till 5 p.m.; on Saturdays from 9 a.m. till 5 p.m. according to the approved schedule/ Online consultations are provided to each group by its instructor. |

Communication with students is provided in a mixed form (face-to-face and on-line).

During distance learning, communication is carried out through the Microsoft Teams platform, as well as through e-mail correspondence, Viber, and Telegram messengers (within which the groups are created, separately through the head of a group).

COURSE DESCRIPTION

The course subject is The English Language

Prerequisites

English, Latin and Ukrainian languages, medical biology, medical and biological physics, biological and biochemistry, human anatomy.

Postrequisites

Fundamentals of medical literature translation

Course purpose is mastering the knowledge and professional competences in English within the spheres and topics outlined in the educational program by the higher education student of medicine which involves advanced development of a foreign language communicative proficiency.

Course objectives:

- to build up the abilities and skills to communicate in English within the spheres, topics and situations defined by the current EPP;
- to improve the skills of understanding, critical analysis and translation of authentic professional texts;
- to develop mastering the ability to express one's thoughts, feelings and attitudes; apply appropriate communication strategies according to different needs in professional activities in English.

Expected outcomes:

On completing the course, a student must

know:

- terminology and grammatical constructions for expressing thoughts; stylistic features of medical English;
- rules for writing messages, opinions, explanations, definitions, reviews, reports, abstracts, etc., which have semantic and logical completeness and correspond to norms of medical records' management;
- peculiarities of communication in professional and social spheres.

be able to:

- communicate with patients and colleagues in English at a highly professional level, in oral and written forms;
- operate and actively use foreign vocabulary in the process of synthesis and analysis of various information sources;
- read, translate (from English to Ukrainian and vice versa), interpret and analyze authentic professional materials in English with annotations and summaries of scientific medical publications;
- keep medical records in English.

COURSE SCOPE

Forms of study and teaching techniques

The course is provided in the form of practical sessions (30 h.) and self-study (60 h).

Teaching techniques:

By the nature of presentation and perception of information:

- *Verbal:* narration, explanation, conversation, instruction, discussion, dispute, case study.
- *Visual:* illustration (including multimedia presentations), demonstration, observation.
- *Practical:* tests; training and creative exercises; solving clinical cases; practical assignments, project design.

By the way of the received information implementation:

- *reproductive* (role play, simulation of a case, etc.);
- *search* (work with reference literature, electronic search information systems, etc.);
- *perceptive* (video lessons, meetings with English-speaking representatives, etc.);
- *logical* (communicative exercises, "case studies" or analysis of a real clinical situation).

Self-study: independent work with recommended basic and additional literature, methodical recommendations of the department, electronic information resources.

Course Content

Topic 1. Higher educational medical institutions.

Deepen narrative skills based on the description of studies at a medical university. Study the lexical material of this topic and to be able to operate with this vocabulary. Describe the types of work of a higher medical educational institution.

Topic 2. Medical facilities.

Learn lexical material related to this topic. Study medical specialists.

Describe the types of medication and their precautions. List the types of institutions that provide medical care.

Topic 3. Examination of the patient.

Learn new vocabulary related to the topic. Name the methods of examination of patients.

Describe the medical examination procedure.

Know the terms related to examination methods.

Topic 4. Musculoskeletal system

Learn terms and term elements related to the structure of the human skeleton.

Name the main parts of the skeleton and its functions. Be able to answer questions to the text.

Topic 5. Anatomy and physiology of the cardiovascular system

Learn terms related to the structure of the heart. Differentiate and analyze term elements. Describe the features of the anatomical structure of the heart. Determine the function of the heart.

Topic 6. Blood

Learn terms related to the composition of blood. Know the structural components of blood.

Familiarize yourself with blood groups and the meaning of this distribution. Get acquainted with the indications and contraindications for blood transfusion. Learn terms related to blood function.

Determine blood functions.

Topic 7. Anatomy and physiology of the respiratory system.

Define medical terms related to the anatomy and physiology of the respiratory system. Describe the structure and processes of the respiratory system.

Be able to answer questions to the text.

Topic 8. Anatomy and physiology of the nervous system.

Learn terms related to the structure of the brain and nerve cells. Describe the structure and processes of the nervous system.

Be able to summarize the text.

Topic 9. Sensory system. Eye.

Learn vocabulary related to this topic. To study the structure and functions of organs of the sensory system. Learn lexical material by topic.

Topic 10. Sensory system. Ear.

Learn the terms related to the anatomy of the ear. Describe the structure and processes occurring in the ear. Be able to answer questions to the text.

Topic 11. Endocrine system.

Learn terms related to the structure and functions of the endocrine system. Determine the localization of glands in the human body.

Be able to summarize the text.

Topic 12. Microorganisms.

Define terms related to this topic.

Be able to describe the functions of different types of microorganisms. Be able to answer questions to the text.

Topic 13. Cell.

Learn terms and term elements related to the topic. To study the structural components of the cell.

To be able to talk about the forms of cell division. Describe the cell cycle.

Topic 14. Tissues.

Learn the terms related to this topic. Know the main tissues and organs of the human body. To study the classification of epithelium

Recommended literature

Basic:

1. Course book on the English language for students of the first year of the medical faculty, ONMedU, Dep. of foreign languages. Odesa, 2021.
2. Grammar Reference "English grammar exercises for medical students" (for ind. work) ONMedU, Dep. of foreign languages. Odesa, 2020.

Additional

ASSESSMENT

Current control: oral survey, testing, evaluation of practical tasks,

communication skills, solving clinical cases, class activities and independent work of a student.

Current control is carried out at each practical class in accordance with the particular topic. Standardized control methods are used to evaluate students' educational activities: oral report on relevant topics, testing, structured written assignments. Forms of current educational activities' assessment are standardized and include control of lexical, grammatical and communication skills.

During the evaluation of each topic in current educational activities, a student obtains grades on a 4-point (traditional) scale considering the approved criteria: maximum grade - 5, minimum grade - 3, unsatisfactory grade - 2.

The current control evaluation criteria

| | |
|-----|--|
| «5» | A student is fluent in the learned material, takes an active part in the subject discussions, confidently demonstrates practical skills while performing tasks, expresses own opinion on the topic and creative thinking. The level of competence is high. |
| «4» | A student has masters the material, participates in general topic discussion, demonstrates practical skills while performing tasks with some errors, expresses own opinion on the topic. The level of competence is sufficient. |
| «3» | A student hasn't got sufficient knowledge of the material studied, is not confident in the topic's discussion. The level of competence is average, reproductive. He/She has the knowledge to overcome the mistakes made. |
| «2» | A student does not master the material studied, does not take part in class discussions. The level of competence is low. |

At the end of the course, the current academic performance is calculated as the average score, that is, the arithmetic average of all current grades on a traditional scale, rounded to two decimal places.

Final control: credit test (assessment in the form of an oral survey)

Evaluation of the current educational activity in a practical session:

1. Evaluation of theoretical knowledge on the subject of the lesson:

- methods: survey, solving a situational clinical problem

- maximum score – 5, minimum score – 3, unsatisfactory score – 2.

2. Evaluation of practical skills and manipulations on the subject of the lesson:

- methods: standardized and include control of vocabulary, grammar and communication skills.

- maximum score – 5, minimum score – 3, unsatisfactory score – 2.

The grade for one practical session is the arithmetic average of all components and can only have a whole value (5, 4, 3, 2), which is rounded according to the statistical method.

Possibility and conditions of obtaining additional (bonus) points: not provided.

STUDENTS' SELF-STUDY WORK

Students' self-study, which is performed on the topic studied along with classroom activities, is evaluated during the current monitoring at the corresponding session. Self-study work involves preparation for each class and the graded test.

COURSE POLICIES

Deadlines and make-ups policy.

Unexcused absences at practical sessions are made up according to the schedule with an instructor on duty.

Absences for valid reasons are worked out according to an individual schedule with the permission of the dean's office. Work-up of missed classes according to an individual schedule is carried out in full at a time specially determined by the head/head instructor of the department every day, but no more than one class per day at the department.

Academic Integrity Policy

Students must observe academic integrity, namely:

- independent performance of all types of work, assignments, forms of control provided by this course work program;
- cite all sources of information in the case of using ideas, designs, statements, data;
- observance of legislation on copyright and related rights;
- providing reliable information about the results of one's own educational (scientific) activity, used research methods and sources of information.

Unacceptable for participants of the educational process are:

- using family or official ties to obtain a positive or higher grade during any form of control of learning outcomes or advantages in academic performance;
- use of prohibited auxiliary materials or technical means (cheat sheets, notes, micro-earphones, telephones, smartphones, tablets, etc.) at controls;
- passing procedures for learning outcomes control by fake persons.

For violation of academic integrity, students may get the following academic penalties:

- decrease in grades for the control work, current performance, credit, etc.;
- retake of assessment (control work, credit, etc.);
- additional control assignments (additional individual tasks, control works, tests, etc.);
- conducting an additional inspection of other works authored by a violator.

Mobile devices

It is allowed to be used with the instructor's permission for performing a task.

Student Conduct

Students and instructors' conduct in a classrooms must be working and calm, strictly comply with the rules established by the Regulations on academic integrity and ethics in academic relations at Odesa National Medical University, in accordance with the Code of Academic Ethics and University Community Relations of Odesa National Medical University, Regulations on Prevention and detection of academic plagiarism in the research and educational work of students of higher education, scientists and teachers of Odesa National Medical University.
